Summary

Third-year CSE student passionate about offensive security and AI safety. Certified eJPT with hands-on experience in penetration testing and CTF competitions. Developed open-source security tools including Guardbound (Neural Barrier Function for LLM safety) and Aegis (red-teaming framework for LLM guardrails). Active researcher in adversarial AI with published work on jailbreak detection. Seeking to apply offensive security skills in high-impact security research.

Projects

Guardbound

Python, PyTorch, scikit-learn

Neural Barrier Function for LLM Safety

- Developed a control-theoretic Q-filter using Neural Barrier Functions to proactively filter harmful multi-turn LLM queries.
- Trained dynamics models and safety predictor on attack datasets; reduced attack success rate while preserving model utility.

Aegis

Python, Flask, SQLAlchemy, spaCy

Adversarial Guardrail Inspection & Evaluation System

- hspace*1.8em ◦ Built an AI-powered red-teaming tool with trust-vector-driven state machine for evaluating LLM safety.
- hspace*1.8em ◦ Implemented 4 drift strategies and dual-judge architecture for systematic guardrail testing.

Cortex

Python, FastAPI, React, TypeScript, fastembed

Second Brain - Local-First Knowledge Management System

- hspace*1.8em ◦ Built a local-first knowledge base with offline semantic embeddings for notes, PDFs, and course materials.
- hspace*1.8em ◦ Implemented knowledge graph with concept linking, citation tracking, and personalized learning roadmaps.

Experience

Cybersecurity Domain Core member

IIT Sri City

Google Developer Groups (GDG)

Jun 2025 – Present

- hspace*1.8em ◦ Mentoring students in cybersecurity through sessions, workshops, and CTF challenges.

Cybersecurity Domain Core member

IIT Sri City

IOTA

Jun 2025 – Present

- hspace*1.8em ◦ Conducted technical sessions on steganography and contributed to cybersecurity workshops and initiatives.

Education

Indian Institute of Information Technology Sri City

Aug 2024 – Expected 2028

textitB.Tech (Hons.) in Computer Science Engineering

Technologies

Skills: Assessment Methodologies, OSINT, Vulnerability Assessment, Penetration Testing, Privilege Escalation, Network Security, Web Application Security, Reporting, Steganography, Machine learning, Deep learning

Languages: Python, C, C++, Bash

Tools: Nmap, Wireshark, The Metasploit Framework, SQLMap, Burp Suite, GoBuster, Mimikatz, Scikit-learn, PyTorch, Keras

Others: Windows(proficient), Linux(proficient)

Certifications

eLearnSecurity Junior Penetration Tester (eJPTv2)

Issued June 2026

[See Credential](#)

Other Experiences

Attended Pycon 2025 India

hspace*1.8em ° Explored Python ecosystem trends, AI/ML advancements, and cybersecurity innovations through talks and workshops.

Abhisarga'26 member

IIT Sri City

hspace*1.8em ° Supported event operations, guest coordination, and participant logistics for the college fest.
